

27 JUN 1978

MEMORANDUM FOR: Director of Economic Research  
FROM: Director of Central Intelligence  
SUBJECT: Study on "Developing Countries: Nuclear Energy  
Programs, Problems and Alternatives"

I have just read your good piece of work, "Developing Countries: Nuclear Energy Programs, Problems and Alternatives." Next October I am scheduled to address a large convention of hydroelectric engineers in Chicago. I wonder if it would be possible to redo this study on an unclassified basis for me to present to them at that time. Perhaps it would be best without the appendices?

DRAFT - Director's Notes

Trip to the National Academy of Achievement

On 24 June in Owensboro, Kentucky I was given an award by the National Academy of Achievement. This is a group that annually brings together several hundred outstanding high school graduates and a number of <sup>people</sup> Americans whom they believe have achieved something in American life. I was, of course, honored to be a recipient. I mentioned ~~at~~ this to all of you, however, because I think more importantly it was an honor to the CIA. When such a group honors the Directors of both the CIA and the FBI along with such people as Debby Boone, Steve Cauthen, Frank Johnson, Olivia de Havilland, Tom Landry and a number of others, clearly they are attempting to point out to these young leaders of tomorrow the importance of our Agency and of the FBI.

- a. I would also like to add that I was most impressed by the reaction of the students in the seminar meetings that I had with them. Their questions about our Agency were constructive, penetrating and informed. Clearly they did not harbor reservations about our activities; more they wanted to know how we were doing and whether we could do the job needed by our country. All in all I was very encouraged by this whole experience.
- b. In connection with this visit, I was badly misquoted in the Washington Post regarding my attitude towards education

for black minorities. The statements I made in Owensboro and my firm views are that one of the most important things we can do to establish true equal opportunity in this country is to improve the quality of education in high schools and universities where there are large percentages of minorities. This was the entire thrust of my remarks and it is something <sup>in</sup> which I believe very sincerely.
